UPDATED PRICE / SKU LIST

3.0 Special Upgrade Rebates

Until December 30, 2010 ONLY!

A gentle reminder that our last chance offer to upgrade legacy BackupEDGE 1.x licenses expires on **December 30, 2010** (we're closed on December 31). We're allowing end users to purchase, register and activate a **BE3CUL** license as an upgrade to get all remaining 1.x clients to upgrade to 3.x at a low price **AND** receive a rebate directly from Microlite Corporation. **BE3CUL** is normally a competitive upgrade SKU, so we're also allowing competitive upgrade licensees to receive the rebate. See the rebate form for details, but hurry, the offer expires soon!

BackupEDGE 3.0
Legacy Upgrade Rebate Form
Competitive Upgrade Rebate Form
Offer Expires December 30, 2010

\$75
Visa Gift Card
With Purchase and Activation by December 30, 2010

Between November 11, 2010 and December 30, 2010, BackupEDGE 3.x part number BE3CUL is available as BOTH a Competitive Upgrade License AND as an upgrade for our legacy BackupEDGE 1.x products.

Switch from another commercial product or upgrade your legacy product to BackupEDGE 3.x and you'll receive a \$75 Visa Gift Card by mail direct from Microlite Corporation.

Requirements:

- Offer valid only for BackupEDGE 3.x BE3CUL license sold, registered, and activated between November 11, 2010 and December 30, 2010. Upgrade license may be purchased from Microlite Corporation or your favorite reseller.
- Send the registration form and this rebate form to Microlite Corporation by December 30, 2010.
- Visa Gift Card will be sent to the end user within 6 weeks of product activation.
- Eligible upgrade products listed on page 2 of this form. Proof of original purchase required for competitive upgrades.

Resellers

There is a special incentive in the *Rebate Offer* to help you when upgrading your clients.

BackupEDGE 3.x continues to grow and offers many benefits over our previous generation of products. It is our go-forward product and with it you'll get the fastest possible support.

User Programming APIS

Many of our clients want to use their own programs and scripts with BackupEDGE. Because of that, we have APIs (Application Programming Interfaces) in our [User Guide](#) to return useful information and perform tasks. With BackupEDGE 03.00.03 build 2, we've upgraded the APIs and *User Guide* to include information about:

edge.segadm, our interface to identifying, initializing and deleting *Segments* to **URL (NAS/FTP)**, **AWS (Amazon S3)**, **SDRIVE (SharpDrive)** and **FSP (Filesystem Partition) Resources**, and

edge.xfer, our "copy to" utility. This is typically used by the *Scheduler* to copy backups to a second *Resource* (Disk-to-Anything-to-Anything backups), but, using this API, users can copy archives from one *Resource* to another.

Please see section 30.10 of the current [BackupEDGE User Guide](#), Maintenance Commands, for more information about these utilities.

SharpDrive™ Update

No other product handles removable disk, flash disk, and cartridge-based disk storage as well as BackupEDGE. Here's a reminder of the feature set.

Features

- Completely automated (wizard-style) one-time preparation of hard drives or flash drives to be used as BackupEDGE devices.
- Automatic Capacity detection. Media may be mixed at random, i.e. a hard drive may be followed by a flash drive and BackupEDGE will understand each.

- Multiple archives per medium, using expiration times and lazy reclamation to maximize the number of archives stored for maximum safety.
- Nine (9) levels of compression.
- Optional encryption.
- Direct booting for *RecoverEDGE* disaster recovery under Linux 2.6.x kernels.
- Full file checksumming for maximum data integrity.
- Instant File Restore* is available from any archive. No need to read through an entire archive to restore individual files and directories.
- MySQL™ hot backups supported.
- Cases where two or more devices are left plugged in are handled automatically.
- Devices can be initialized as unique, separate *Resources*, so that different tasks can go to different media concurrently, or cases such as "backup to Resource 1, then copy the backup to Resource 2 for off-site storage", can be supported.

During disaster recovery, *RecoverEDGE* automatically scans all connected *SharpDrive*-formatted media and shows all archives available for restore.

Availability

SharpDrive is supported under **Linux, UnixWare 7.1.4** and **OpenServer 6.0.0**. Legacy FSP / AF support for these devices is still available.

OpenServer 5 clients must still use FSP / AF Resources. *SharpDrive* support is not available.

Please see our [web site](#) and on-line [User Guide](#) for more information on *SharpDrive Media*.

BackupEDGE 2.x End-of-Life

We continue to support BackupEDGE 2.x, but it is no longer available for retail sale. See the next page for additional information on current products, SKUs and pricing.

BackupEDGE 3.0 Pricing- Current Release is 03.00.03 build 2

BackupEDGE 3.0 pricing^(a) is now in effect. All BackupEDGE Licenses are now delivered via printed or emailed License Form only, i.e. no media is shipped unless a media kit **BE3MKT** is ordered.

SKU	Description	Suggested Retail Price ^b	NOTE
Commercial Retail Licenses			
	BackupEDGE 3.0 Licenses install and activate on: Linux 2.6.x / 2.4.x (Intel IA32/EM64T/AMD64) SCO OpenServer 6.0.0 SCO OpenServer 5.0.5 - 5.0.7 / 5.0.7V SCO UnixWare 7.1.4

a - All prices listed are in US dollars. All other SKUs are retired and discontinued.

b - Manufacturer's Suggested Retail Price.

c - BackupEDGE 3.0 Retail Licenses include a one year Support / Maintenance Subscription.

d - Applies to Upgrades from BackupEDGE 2.x Licenses not under a current Support / Maintenance Subscription. Includes one year Support / Maintenance Subscription. Old BackupEDGE serial number required for activation.

e - Competitive Upgrades are for those wishing to switch to BackupEDGE from retail copies of Acronis for Linux, ARCserve, Arkeia, BRU, Lone-Tar, NetBackup, NetVault, TapeWare, Zmanda and similar products. ARCserve Lite, open source software and things that come free with tape drives or the operating system do not qualify. Includes one year Support / Maintenance Subscription. Proof of purchase of the product being upgraded required for activation.

f - Support / Maintenance Subscriptions are for BackupEDGE 3.x clients wishing to renew. Valid 3.x Serial number and operating system release information required to order. This SKU is NOT correct for BackupEDGE 2.x licensees, who need to order a BE3PUL which includes a one year Support / Maintenance Subscription.

BackupEDGE 1.x Licensees may use the BE3CUL as an upgrade to 3.x only until December 31, 2010. Starting January 1, 2011, a new license must be purchased.

On behalf of the entire team here at Microlite Corporation, I'd like to wish you all a very Merry Christmas, a Happy Holiday Season, and a very Happy and Prosperous New Year!
